**EVA EMP
Test Report On Energy Consumption**

Machine Information:

Machine Type	Zia 6.000 series
Model number	9CND
Manufacturer:	de JONG DUKE

Boiler Volume:	0,72	Litre
Nominal Boiler Temperature:	92,0	°C
Energy Saving Temperature:	65,0	°C

Test Conditions:

Ambient Test Temperature (°C)	23,1	°C	+/- 1 °C
Ambient Test Relative Humidity (%)	42,3	%	+/- 20 %
Inlet Water temperature (°C)	20,0	°C	+/- 2 °C

Energy Measurements Hot Drinks:

Heat Up phase measurement	HU	68	Watt hours
Idle phase Measurement	IM	39,96	Watt hours / Hour
Vending phase Measurement (30 consumptions)	VM	388,04	Watt hours
Average Drink Volume Measurement	DV	0,140	Litre
Number of Drinks delivered	NOD	30 Cups	
Average Drink Temperature Measurement	DT	81,6	°C
Cool down Duration (From IS to ESS)	CCD	1	Hours
Cool down energy consumption	CD-ESM	10	Watt hours
Energy saving mode measurement	ESM	24,86	Watt hours
Heat up form energy saving mode	HU-ESM	28	Watt hours

Energy Label:

Energy consumption per liter (ECPL)= 100 Watt

Test Performed by Technical Support
Date: 26-06-2019

Signed:
